

# OLD MUTUAL MONEY MARKET FUND

## FUND INFORMATION

### RISK PROFILE

Low	Low to Moderate	Moderate	Moderate to High	High
-----	-----------------	----------	------------------	------

### RECOMMENDED MINIMUM INVESTMENT TERM

1 year+	3 years+	5 years+
---------	----------	----------

### FUND OBJECTIVE

The fund aims to deliver a regular income and to outperform bank deposits over time, while preserving capital. The fund has never experienced a negative return over any calendar month since inception.

### WHO IS THIS FUND FOR?

This fund is suited to investors who want a liquid investment that delivers a regular income and/or maximum capital protection, but who understand that their investment is unlikely to keep pace with inflation if held in the long term.

### INVESTMENT MANDATE

The fund invests in money market securities with a maturity of less than 12 months. The fund's average maturity may not exceed 90 days.

### REGULATION 28 COMPLIANCE

The fund is not required to be Regulation 28 compliant in terms of its Deed, but the fund manager is mandated to comply with Regulation 28 on a day-to-day basis.

## FUND COMMENTARY as at 30/06/2018

The rand has experienced a 14% depreciation over the second quarter of this year following the 25 basis point (bp) interest rate cut by the South African Reserve Bank (SARB) in March. This resulted in money market rates moving higher and has contributed to a particularly volatile trading environment. The weakening in the domestic market, together with the steady increase in oil prices, added to the upside risks to inflation and contributed to the SARB maintaining the repo rate at 6.5% at last month's Monetary Policy Committee (MPC) meeting.

Due to the volatile trading conditions, as well as the increased risks to the economy, the fund held back on adding any undue fixed rate exposure, especially when the spread between 12-month and 3-month JIBAR traded below 90bps. Since the end of the first quarter, however, the forward rate agreement (FRA) curve has steepened quite notably and is now pricing in two 25bp

rate hikes over the next 12 months. Accordingly, bank negotiable certificate of deposit (NCDs) rates have also steepened with the spread between the 12-month and 3-month JIBAR widening to 120bps, up around 30bps since the beginning of April.

At present, we maintain our view of rates remaining unchanged for the rest of the year and given the steepening in the NCD curve over the quarter, we have opportunistically bought 12-month fixed rate assets at spreads that we believe offered value. That said, we have also been buyers of floating rate assets in both the 12-month and 6-month regions. These assets were purchased at attractive spreads and helped in managing the interest rate risk in the fund. In addition, we have also been active participants at the weekly Treasury Bill auction as they are currently still trading at a premium to bank NCDs, especially in the front end.

## OTHER INVESTMENT CONSIDERATIONS

### MINIMUM INVESTMENTS:

- Monthly: R1 000
- Lump sum: R10 000
- Ad hoc: R1 000

### INITIAL CHARGES (Incl. VAT)\*:

There is no initial administration charge. Initial adviser fee will be between 0% and 0.69%.

\* Please note: Initial charges do not apply to the Class B funds.

### ONGOING

	Class A	Class B1*
Annual service fees (excl. VAT)	0.50%	0.25%

\* Please note: The Class B1 Fund is only available through investment platforms such as Old Mutual Wealth. The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, are included in the TER. A portion of Old Mutual Unit Trusts' annual service fees may be paid to administration platforms.

**TAX REFERENCE NUMBER:** 9007/027/60/1

<b>ISIN CODES:</b>	<b>Class A</b>	ZAE000020749
	<b>Class B1</b>	ZAE000137642

Total Expenses (Incl. Annual Service Fee) (31/03/2018)	36 Months		12 Months	
	Class A	Class B1*	Class A	Class B1*
Total Expense Ratio (TER) Incl. VAT	0.58%	0.30%	0.58%	0.30%
Transaction Cost (TC)	-	-	-	-
Total Investment Charge	0.58%	0.30%	0.58%	0.30%

\* Please note: The Class B1 Fund is only available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

Funds are also available via Old Mutual Wealth and MAX Investments.

**FUTUREGROWTH**  
/ ASSET MANAGEMENT

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- You should ideally see unit trusts as a medium- to long-term investment. The fluctuations of particular investment strategies affect how a fund performs. Your fund value may go up or down. Therefore, we cannot guarantee the investment capital or return of your investment. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at [www.omut.co.za](http://www.omut.co.za) or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except the Money Market Funds, the price of which is set at 13:00. These are also the times we value our funds to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- A money market fund is not a bank deposit account. Its unit price aims to be constant but investment capital is not guaranteed. The total return is primarily made up of interest (declared daily at 13:00) but may also include any gain/loss on any particular instrument. In most cases this will merely have the effect of increasing or decreasing the daily yield, but in the case of abnormal losses, it can have the effect of reducing the capital value of the fund. The published yield is calculated using the average of the fund's previous seven days' net income (and assumes all income was reinvested). This figure is then annualised, which is the weighted average compound growth rate. Excessive withdrawals from the fund may place the fund under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and managed payouts over time may be followed.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 30 June 2018.
