

**The Futuregrowth Enterprise Solutions team has a vacancy for
A Business Analyst**

Preference will be given to suitably qualified previously disadvantaged candidates who add to the diversity of the company at all levels.

Purpose:

The Business Analyst will elicit, facilitate and document technical solutions to business problems. The role will also require project management skills. The BA will use the requirements to drive the design or review of test cases, process change requests, and manage a project's scope, acceptance, installation and deployment

The successful candidate will form part of the Enterprise Solutions team and report to the head of the team. Our ideal candidate has the ability to work on multiple projects simultaneously and translate business data into digestible information which improves systems & processes. The short term objective is to ensure the best intelligence is built into the data warehouse and its outputs. The Business Analyst role will also help to enable and empower staff to become 'digitally fit' and to drive innovation across the organisation. The incumbent will facilitate progressive thinking using the BA toolkit across the company while contributing toward the change management required across the organisation.

Key Result Areas:

- Creating the business case proposals
- Planning ,measuring and monitoring of deliverables
- Eliciting requirements
- Workshop facilitation
- Process ,systems and data modelling ability
- Requirements organisation
- Translating and simplifying requirements
- Requirements management and communication
