

## **The Futuregrowth Enterprise Solutions team has a vacancy for A Business Analyst**

*Preference will be given to suitably qualified previously disadvantaged candidates who add to the diversity of the company at all levels. The position is based in Cape Town.*

### **Purpose:**

The Business Analyst will elicit, facilitate, synthesise and document technical solutions. The role will also require project management skills. The BA will use business requirements to drive the design or review of test cases, process change requests, and manage a project's scope, acceptance and implementation.

The successful candidate will form part of Enterprise Solutions team and report to the manager of the BA area. Our ideal candidate has the ability to work on multiple projects simultaneously and to translate business data into usable information which will help to improve systems & processes. The short-term objective is to contribute toward the delivery of a data management related project.

The Business Analyst role will also help to enable and empower staff to become 'digitally fit' and to drive innovation across the organisation. The incumbent will facilitate the change management processes required across the organisation.

### **Key Result Areas:**

- Development of business case proposals
- Planning, measuring and monitoring of own deliverables within the sprint framework.
- Business Requirements Workshop Facilitation
- Employing full range of business analysis techniques in agile environment:
  - Eliciting requirements
  - Requirements organisation
  - Translating and simplifying requirements
  - Requirements management and communication
- Vendor relationship management
- Driving business analysis best practice to IIBA standards
- Facilitating UAT
- Project Steering committee presentation and reporting

### **Technical/professional knowledge and skills:**

- BComm - Information Systems or IT related degree
- FTI Business Analysis diploma
- Project Management related qualification would be an advantage PMI, PMP or PGDPM
- 3+ years of associated work experience
- Experience in Financial Services or Asset Management
- Proven knowledge & experience in an Agile environment
- Excellent MS office skills including Visio and MS project
- CBAP would be an advantage
- Infostore skills would be an advantage
- Team foundation server skills would be an advantage
- Quality Assurance and (automated) testing experience and training would be an advantage

- SQL Skills would be an advantage.
- Production Support and Troubleshooting experience would be an advantage.
- Strong visualization skills using Visio or similar
- The ability to work independently
- Ownership and commitment to delivery
- Process, systems and data modelling ability

## **Closing date**
